Subject: Letter of Appreciation and Gratitude for Supporting the Cancer Healer Therapy Research

Dear Dr. Trang Krishna,

On behalf of our entire research team, I would like to express our sincere appreciation and heartfelt gratitude to you and the Cancer Healer Center for your generous financial support and continued confidence in our research on **Cancer Healer Therapy**. Your support has enabled us to undertake a comprehensive scientific evaluation of the polyherbal formulation using internationally accepted experimental approaches. The study has generated highly encouraging findings demonstrating that the Cancer Healer Therapy formulation possesses significant anticancer potential against both breast and ovarian cancer models.

The investigation showed that the formulation significantly reduced cancer cell viability, inhibited cell migration and clonogenic growth, induced programmed cell death through activation of the intrinsic apoptotic pathway, and produced distinct transcriptomic changes affecting several cancer-associated molecular pathways. These findings provide an important scientific basis supporting the therapeutic potential of the formulation and represent a major step toward evidence-based validation of this integrative therapeutic approach. We are pleased to inform you that the manuscript entitled **"Integrative Evaluation of a Polyherbal Formulation (Cancer Healer Therapy) Reveals its Potential Anticancer Activity in Breast and Ovarian Cancer"** has been prepared and is currently under publication.

We sincerely acknowledge that this work would not have been possible without the vision, encouragement, and financial support extended by the Cancer Healer Center. Your commitment to promoting scientific research in complementary and integrative oncology is highly commendable and will contribute significantly toward generating evidence-based therapeutic options for cancer patients. The promising outcomes of this preclinical investigation have laid a strong scientific foundation for advancing the research further. We look forward to working together for **Phase I clinical trial** to evaluate the clinical efficacy of Cancer Healer Therapy in cancer patients in accordance with regulatory and ethical guidelines.

Once again, we express our sincere gratitude for your invaluable support and trust. We look forward to continuing this fruitful collaboration and translating these encouraging laboratory findings into meaningful clinical benefits for cancer patients.

With warm regards,

(Dr. Ashok Sharma)

(On behalf of the Research Team)
